-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2, 13, 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As regards the claims drawn to limitations wherein the "light sources illuminate with illumination cone angles that are expanded in a direction paralleling the first tilt axis" . this seems to imply that the DMD will received only light from a periphery of the cone of illumination. Further, the illustration of Figure 2, such a direction of expanded cone angle would be from an LED element (r or g or b) intersecting the element 214. such a direction is not parallel to the tilt axis. Please clarify.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 23, 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Takeda et al. (2003/0218794).

Takeda et al. disclose a projection device and a method of controlling it wherein :

a plurality of light sources (21, 22, 23) disposed along an axis are disposed on a plane to selectively emit lights;

controlling a plurality of micro mirrors (31) to selectively tilt relative to a plurality of tilt axes 35 (one to each element) to selectively reflect lights from the sources, the controls being according to digital image control signals (40).

Allowable Subject Matter

5. Claims 1, 3-12, 14-22 are allowed.
